

ABSTRACT OF THE DISCLOSURE

The card game scoreboard is a round peg tally board with concentric scoring tracks, lap tracks and game tracks with each track color coded to corresponding pegs for the respective players or teams. Provisions allow for the display of the bid and/or a named trump suit for card games using these features. Negative scoring can also be accommodated. The design provides a clear visual display of scoring for any game whose requisite number of points and/or games to win can be accumulated with pegs on a combination of scoring, lap and game tracks.
